DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, 8-17 and 21-30, drawn to a method altering fiber development or properties of a fiber producing plant by expression of sucrose synthase in fiber producing cells, and fibers thereof, classified in class 800, subclass 298.
- II. Claims 1, 4-11, 15 and 18-30, drawn to a method altering fiber development or properties of a fiber producing plant by reducing the expression of sucrose synthase in fiber producing cells, and fibers thereof, classified in class 800, subclass 285.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are a method of altering fiber development or properties in fiber producing plants by expression of sucrose synthase in fiber producing plants of Group I; and a method altering fiber development or properties of a fiber producing plant by reducing the expression of sucrose synthase in fiber producing plants of Group II. The two different methods have different method steps one requiring the expression of RNA that is translated into protein and the other requiring the expression of RNA that is capable of reducing expression of an endogenous sucrose synthase gene. The RNA expressed in either group is not required by the other group.

Art Unit: 1638

Claims 1, 8-11, 15, and 21-30 link(s) inventions I and II. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s) 1, 8-11, 15, and 21-30. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and because the search required for one of the groups is not required for another, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
